Prophit® Progress Enterprise

Web Based Advanced Production Reporting for Operational Improvement

Prophit® Progress Enterprise = Profit Improving Behaviour

Prophit® Progress Enterprise = Profit Improving Behaviour

Performance improvement in manufacturing is maximised by your whole operations team knowing the largest cost opportunities. This allows your team to apply their united efforts to remove these production costs. **Prophit® Progress Enterprise** has been designed to provide the pertinent information to enable this profit improving behaviour. Does your operations team:

- Spend hours collating reports for meetings
- Have so much information they don't know what to do next
- Spend half their time in meetings deciding what is the biggest problem
- Have different systems e.g. ERP, spreadsheets, CMMS that they need to access to get the information they require to manage the business
- Have the ability to quickly see trends appearing to support planned maintenance
- Have readily available information to problem solve when the KPIs are not matching your goals
- Have the ability to go to any PC on the LAN and quickly access the information they need

Prophit® Progress Enterprise Production Reporting software is designed to engage your operators to provide information regarding their downtime and waste issues. This is combined with automated data capture (from machines, ERP, CMMS or other information systems) and the information is presented in formats to support your business processes. This enlightens your operations management team with objective shop floor experience balanced with the financial implications to truly manage improvement within the business.

- Shift handover reports

- Daily production reports

- Weekly improvement reports

- Weekly schedule review reports

- Monthly Management reporting

- Monthly Operations Reviews

- Adhoc improvement projects

Prophit® Progress Enterprise is designed to facilitate a continuous improvement culture.

The **Prophit® Software Suite** can be stand alone modules or a fully integrated sales and operation planning system, Forecast Manager is accompanied by the following modules:

Prophit® Forecast Manager	**Prophit®** Master Production Scheduling
Prophit® E-Planner	**Prophit®** MasterView
Prophit® RCCP	**Prophit®** Manufacturing Execution System

Prophit® Progress Enterprise

Is an innovative Productivity Management and Process Improvement Reporting Solution.

It is specifically designed to allow you to identify all of the waste and lost time in your process, while simplifying your daily, weekly and monthly reporting requirements.
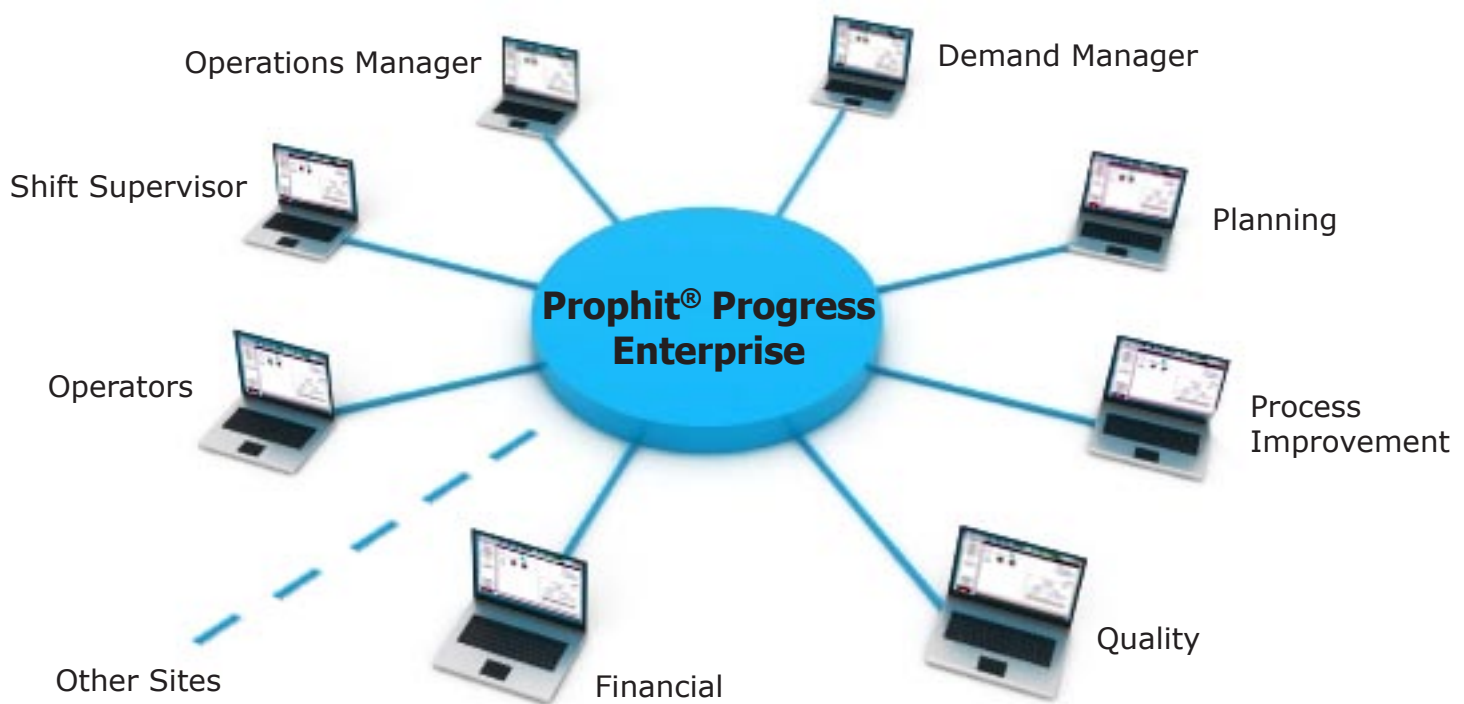

Facilitates Cohesive Management

Effective management of manufacturing plants requires immediate response to critical issues and tactical response to trending problems.

In line with the Australian Business Framework of Excellence, **Prophit® Progress Enterprise** provides information and reporting formats to support shift handovers, daily production reviews, weekly trend analysis and monthly reporting to budget. With this information at your fingertips, you and your team will focus on diagnosing and improving, rather than collating and formatting.

Prophit® Progress Enterprise

Prophit® Progress Enterprise provides a range of powerful and easy to understand graphical reports that simplify the identification and quantification of the key problem areas in your manufacturing plant. Your team is immediately focussed by cost variance reporting and opportunity cost reporting, they will naturally and rapidly focus on the big ticket items and work with you to solve them.

Align Resources

Prophit® Progress Enterprise ties your planning processes into your improvement process through powerful schedule adherence and performance to plan reports. At any time through the month you can see projected shortfalls and problem areas.

Prophit® Progress Enterprise Key Features:

> SLICE & DICE CAPABILITY
> PROFIT INDICATOR - DYNAMIC DISPLAY OF IMPACT OF CHANGES
> SUPPORTS DATA STREAMS
> USES ONE CENTRAL DATABASE
> PLUG-IN MODULES
> FLUID INTEGRATION OF PROPHIT SUITE WITH ERP & MRP SYSTEMS
> COMPLETE VERSION CONTROL

Your Operations, Supply Chain, Quality and Financial teams are aligned and focused.

Customisable

Prophit® Progress Enterprise is fully configurable and truly flexible. It comes with a suite of predefined reports. For all reports you select the desired date range and then filter to include one, many or all machines, each report can also be filtered for shift, crew and/or product type.

Beyond the built in flexibility there is the facility to have unlimited customised reports. Data can be exported or cut and paste into Microsoft tools such as excel or word making ad hoc reporting a breeze. The data entry requirements for Progress are tailored to your requirements. They can be changed or modified as your environment changes.

Progress is fully equipped to run as a stand alone product or it can be integrated with your ERP system, other information systems and existing shop floor data collection systems. No matter how data is collated your operations team can view 100% of your operations.

Tailored To Your Site

At installation Progress will be configured to get as much data as required, but with as little effort as possible. If all information is already available in your systems then **Prophit® Progress Enterprise** will extract the data from those sources.

Should extra data be required then data capture methods will be agreed and implemented.

Easily integratable

Easy integration and rapid deployment implementation provide you with the assurance that from deciding on **Prophit® Progress Enterprise** your team remains focused on improving your business.

Why Use Prophit® Progress Enterprise?

1. Web deployed, full .NET architecture. Fast, efficient and future-proof.

2. Includes Profit Impact drill down for full financial impacts of causes of lost time and waste streams. Clear diagnostic tools and timely information will be at the fingertips of you and your management team.

3. Includes OLAP cube for adhoc graphing of any captured metrics. Clear information will move your teams collective thinking from trying to guess what happened to understanding what the opportunities are and asking "What can we do to improve them?"

4. Includes fully capable report writer, for in house unlimited enhancements. Reporting includes Schedule adherence, cost variance, cost of improvement opportunities.

5. Includes fully configurable data entry stations, for evolving or expanding businesses structure. Facilitates paperless shop floor manufacturing.

6. Accepts real time data capture as input to data entry screens, so operator comments can accompany automated data capture from electronic way scales or other PLC outputs. Your valuable management time will not be squandered on trying to source, collate and then format the information you need.

7. Displays **Prophit® E-Planner** schedules on the shop floor, to integrate the feedback loop.

8. Pre-Formatted reports displaying line throughput trends and causal Pareto graphs makes shop floor communication as simple as clicking a button.

9. Provides Work order closing and Batch tracking facilities to close the loop and Keep ERP updated with latest relevant shop floor information.

10. Structured reports designed to support decision making ensure that each management meeting forum has the appropriate information to support focused, action oriented outcomes.

Invest in Progress and watch your management team shine.
